## Summary

---

Computer Science graduate with a Distinction average with experience in managing teams, projects, and stakeholders in the construction industry. Developing skills in full-stack software development using Python, Django, React, and JavaScript. Seeking graduate software engineering positions to utilise my technical and problem solving skills to ensure stakeholder and user requirements are met.

## Education

---

**Charles Sturt University:** Bachelor of Computer Science

June 2026

**Major:** Web Development

**GPA:** 6.09/7.0 (Distinction Average)

## Projects

---

### Blueprint - Project Management Suite

[GitHub \(Frontend\)](#) | [GitHub \(Backend\)](#)

- Developing a full-stack project management suite for residential and commercial construction companies, allowing management of workflow and tasks for projects from pre-site to handover
- Developing a Django REST API backend that handles authentication, business logic, data validation, and functionality of the application and serves data to React frontend
- Developing a responsive and mobile-friendly UI and UX using React and Tailwind CSS that fetches required user data from Django REST API endpoints
- Django REST API endpoints functionality and usage tested throughout development using Postman

### Melior - Free Invoice Generator

[melior.biz](#) | [GitHub](#)

- Developed a free online invoice generator which can be used by individuals and businesses to instantly download professionally templated invoices, no registration or subscription required
- Functionality and logic of application created solely in vanilla JavaScript which includes form handling, monetary calculations, and PDF generation with html2pdf.js library, allowing invoices to be generated through the client locally without requirement of a backend
- Designed in Figma and Developed with HTML, CSS, and JavaScript

### Yates Roofing Website

[yatesroofing.net](#)

- Designed and developed responsive and mobile-friendly website for local roofing company, features a photo gallery, contact page, and roofing options for potential customers
- Delivered full workflow from design to deployment which includes consultation, Figma design mockups, HTML and CSS build, and Netlify deployment

### Northend Boxing Website

[northendabc.net](#)

- Designed and developed a responsive website for local boxing gym business, mainly used by customers to view class timetables and sign up for memberships
- Gathered client requirements and used them to create the design and layout for the website using Figma prior to development and developed using HTML, and CSS.

## Experience

---

**Construction Contractor,** Self Employed - Sydney, NSW

May 2025 – Present

- Contracting as a sole trader to a construction company while completing studies for Bachelor of Computer Science full-time.

**Application Support Analyst,** Sekisui House Australia - Sydney, NSW

Nov 2024 – Apr 2025

- Led upgrade of Sekisui House ClickHome application instance, gathered pain points and requirements from construction supervisors and office personnel and liaised with ClickHome development team to design and deploy changes
- Performed User Acceptance Testing (UAT), validated software changes with users prior to production deployment
- Managed ClickHome application issues through Jira, worked with stakeholders to define requirements and improve business processes

**Construction Supervisor, Sekisui House Australia – Sydney, NSW**

Nov 2023 – Nov 2024

- Oversaw 15+ construction projects from site start to handover, coordinating contractors, inspections, and client communications to meet completion targets.

**Construction Supervisor, McDonald Jones Homes – Sydney, NSW**

June 2022 – June 2023

- Managed 20+ concurrent projects liaising with clients, contractors, and office personnel ensuring high customer satisfaction
- Resolved project issues with stakeholder communication, analysis, and decision making

**Construction Manager, Metricon Homes – Sydney, NSW**

July 2020 – June 2022

- Led a team of 6 construction supervisors, each managing 10-15 projects generating \$2-3M in combined monthly revenue
- Improved overall efficiency on projects by 30% on average through planning and process improvements

## **Skills**

---

**Languages:** Python, JavaScript, Java, SQL, HTML, CSS

**Frameworks:** Django, Django REST Framework, React, Tailwind CSS

**Tools:** Git, Jira, Postman, Figma, Netlify
